
POSITIONS AVAILABLE

PROJECT ARCHITECT / LEADER

You are a registered architect (or close to registration) with minimum five years of local multi-residential experience. You enjoy managing and documenting projects from start to finish and have an appetite for design legibility with astute technical knowledge to go with it. You will be given autonomy to run projects with minimal supervision, have excellent communication skills and thrive on leading construction documentation teams to deliver user-focused outcomes. By now, the use of ArchiCAD is second nature to you.

Opportunities to be part of the leadership team await for the right candidate.
